Rockefeller and Morgan Will Control Great Pan-

American Bank. START IN BUENOS AIRES

Indorsed by President Taft in His

Message to Con-

#### President's Reference to Pan-American Bank

Besides the fundamental doctrines of our pan-American policy there have grown up a realization of political interests, community of institutions and ideals, and a flourishing commerce. All these bonds will be greatly strengthened as time goes on and increased facilities, such as the great bank som to be established in Latin America, supply the means for building up the colossal intercontinental commerce of the future.—President Tatt's message to Congress.

NEW York, December 8,-"The great bank soon to be established in Latin America," mentioned in the President's message to Congress, will be controlled by the Morgan-Rocke-feller interests. The scheme, which was indorsed by the last Pan-American Congress, and which has the hearty support of the administration, has been engaging the attention of National City Bank experts for many months. At first it was intended to form a great Pan-American bank in New York, with branches in the centrals of city with branches in the centrals of city great Pan-American bank in New York, with branches in the capitals of all the Latin-American republics. This pian was urged strongly by Senator Root, but it was found to be impossible of realization under the existing banking laws. James Stillman, William Rockefeller, George W. Perkins and Frank A. Vanderlip were mentioned as among the influential financiers who would apply for the charter.

mentloned as among the influential financiers who would apply for the charter.

To Start in Buenos Ayres.

The bank now contemplated will, it is believed, he started in Buenos Ayres, with possibly a branch in Rio Janeiro. The attempt to free the merchants of this country from their present dependence on the bankers of Europe in their transactions with their Latin-American clients will not be started on the grand scale at first planned.

Experts have satisfied themselves that at least ten years would elapse before an American bank in Buenos Ayres or Rio could be really profitable, and it is considered that a capital of five or ten million dollars for cach place would be all that conditions in the near future would justify. This is small compared with the big institutions already existing in these equities backed by English and German capital.

No College Men on Staffs.

Enough progress has been made, however, by the promoters to justify the tentative selection of a staff for the bank to be started in Buenos Ayres, and it has been decided to profit by the experience of the International Banking Corporation, which has cased to appoint college men on the staffs of their branches in foreign lands. The new bank will be run by men "who started in as office of the plan for an "international American bank" advanced by Secretary Blaine in a "international American bank" advanced by Secretary Blaine in a to President Harrison in May, 1390.
